SUMMARY

I am a Full Stack Developer with a degree in Information Technology and practical experience from developing various projects in a dynamic workplace. My expertise lies in deploying applications on AWS, migrating legacy systems, and creating innovative tools like AI-powered album cover and graph makers. I am passionate about using technology to simplify complex tasks and provide user-friendly solutions

EDUCATION

BE (Information Technology)

Pimpri Chinchwad College of Engineering

📅 08/2019 - 06/2023 📍 Pune, India

- 9.32 GPA

EXPERIENCE

Full Stack Developer

Dreamcare Developers Pvt. Ltd

📅 09/2023 - Present 📍 Pune, India

- Developed and maintained dynamic government and district police websites using **Next.js with server-side rendering (SSR)** to ensure **SEO optimization and fast load times**.
- Led the scaling of the **Maharashtra SRPF recruitment portal**, configuring **Nginx, PM2**, and **AWS EC2** to handle **high traffic during police recruitment drives**.
- Built secure **admin dashboards** for dynamic content management, complaint monitoring, and real-time updates to site content.
- Implemented **Online citizen complaint forms**, integrating submissions with the admin dashboard for review and follow-up.
- Added features for **filtering, searching, and exporting complaint data**, improving internal efficiency and case tracking.
- Worked across the **full stack**, managing both backend logic in **Node.js** and frontend interfaces in **Next.js**.
- Reduced monthly AWS Bill by 40% by optimizing the resources.

Framework Engineer Intern

Quantiphi Analytics Solutions

📅 03/2023 - 07/2023 📍 India

- Worked as a Data Engineer Intern, assisting in the design and optimization of data pipelines for efficient data ingestion and processing.

SKILLS

AWS	C/C++	CSS	ES6	Git	GitHub	HTML
JavaScript	MongoDB	Next.js	Postman	React		
S3	SEO	SQL	TailwindCSS	Node.js		
Express.js	ES6+					

PERSONAL PROJECTS

Album Cover Maker

🔗 <https://www.albumcovermaker.com>

A project to generate album covers using AI technologies

- It lets you make stunning album covers from the description of the album (text-to-image)
- Stable diffusion image generation API used at the core.
